SPEAKER PRESENTATION:

Guest Speaker Laura Mathews, RN came to our Club to discuss diabetes in children, as that is part of our Lions Camp efforts. Initially, she shared current stats that there are 29.1 million people (approx. 10% of our country's population) 90% Type 2 and 10% Type 1. Undiagnosed diabetes can lead to DKA (diabetic ketoacidosis).

She shared that there are two types of diabetes, Type 1 and Type 2. Type 1 is the most common among children. This most commonly presents with symptoms of unquenchable thirst, can progress to vomiting and generally not feeling well. Most children with the proper medical care may expect Insulin use with diet and activity management.

Type 2 typically involves adults and can be managed with medication, regular diet and exercise.

Lion Randy shared that ADA blood tests can test for antibodies of early onset.
